RE: ML 47722-MP

Dear Ms. Bown:

On May 20, 2003, Lynn Kunzler of the Division of Oil, Gas & Mining and I visited the quarry site under ML 47722-MP to examine mining operations with respect to the West boundary line of the permit area. Additional GPS readings were taken and analyzed. We conclude that the small north-south strip of stone outcrop at the western boundary of your permit area that was thought to lie within the lands formally Permitted to Lanny Jensen (your FAX of June 19, 2002) actually lies within the lands Permitted under ML 47722-MP. You may therefore proceed to remove said stone as part of your mining and reclamation operations under ML 47722-MP without further amending the permit.

All reclamation of mining activities under ML 47722-MP and the impacts to adjoining lands should be coordinated through the surface landowner, Mr. Gerald Willden, and the Division of Oil, Gas & Mining, Mr. Lynn Kunzler.

Please contact me if you have any questions in this matter.

Sincerely,

John T. Blake
Mineral Resources Specialist
